

## IMC Club Meeting

It's not unusual for an instrument flight to present challenges that we couldn't have predicted before departure. Let's face it, stuff happens! However, we can reduce some risks by making good decisions on the ground before we depart, while other risks come up in-flight and must be managed real-time. This scenario provides the opportunity to work on both of those critical decision making skills. Please join us for this informative meeting. Click on the link below and register TODAY.

**Directions:** Off Route 110. Main Terminal building second floor.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
